RESPONSE

Sir:

In response to the "Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures," mailed November 13, 2001, Applicant submits the following remarks.

REMARKS

In the Notice, Applicant is advised that the computer readable form of the sequence listing fails to comply with the requirements of 37 C.F.R. § 1.822 and/or 1.823, because it did not contain any readable data. In response, Applicant encloses a diskette containing another copy of the computer readable form of the Sequence Listing, which he requests the Office to place into the application file.

The new computer readable form of the Sequence Listing has been prepared using a newer version of PatentIn (ver. 3.1) than was used to produce the original paper copy of the sequence listing (ver. 2.1). There are slight formatting differences caused by the different versions of this program. To overcome this problem, Applicant encloses a substitute paper copy of the sequence listing that has been generated by PatentIn 3.1. Please replace the current sequence listing with the substitute sequence listing.

In accordance with 37 C.F.R. §1.821(f), the undersigned verifies that the computer readable form and paper copy of the Sequence Listing submitted with this response are identical. The undersigned also verifies that no new matter is included with this submission.

Please grant any extensions of time required to enter this response and charge any additional required fees to our deposit account 06-0916.

Respectfully submitted,

FINNEGAN, HENDERSON, FARABOW,
